

Qualitative Results: SAM2 vs SAM2-Lite

Challenging scenarios: occlusions, deformations, and similar objects

Occlusion

Deformation

Similar Objects

Fast Motion

Input Frame

Ground Truth

SAM2 (Teacher)

SAM2-Lite (Ours)

Comparison

SAM2:	86.5% J&F
Ours:	84.5% J&F

Difference: -2.0%
(96% of teacher)

Key Observation: SAM2-Lite produces visually similar results despite using 48× fewer parameters

Minor differences in edge sharpness and very small object details | Overall tracking accuracy maintained
